

Annual Brassica Blend Instructions

Seeding Instructions

Seed at a rate of 8 lbs. per acre (43,560 sq. ft.) at a depth of 1/8 to 1/4 of an inch deep in a weed free environment. This can be accomplished by tillage or chemical control and using no-till or minimum-till planting.

Fertilizing Instructions

A soil sample is recommended to balance Ph and soil nutrient levels (a complete soil analysis can be obtained from Farmers Exchange). In the absence of a soil sample apply 300# of pelletized lime and 300# of 19-19-19 fertilizer per acre before seeding.
